Ag Health Solutions

## AquaSplit

Our patented water energizer uses a magnetic field to restructure water, breaking minerals into smaller, more bioavailable particles so plants and livestock absorb more nutrients and oxygen with every drop.

We guarantee at least a 10% increase in yield while using less water. Our soil conditioners help your livestock take in more nutrients and oxygen, loosen soils for deeper root growth, and wash out harmful salts.

### Key Benefits:

- Improved Hydration: Structured water is absorbed by animals at least 10% more efficiently.
- Increased Nutrient Uptake: Smaller mineral particles are absorbed faster and more completely.
- Clean Water Storage: Split molecule water cannot carry algae or harmful bacteria, cleaning out water troughs and tanks efficiently and effectively.
