Soil Health Solutions

MAVERICK BIO Liquid Fertilisers

A combination of tried, proven and economical fertilisers. Maverick Bio is multi-purpose and can be used as soil or foliar applications and fulfils all the nutrient requirements for your soil and your stock. Mineral based, it works on providing a complete solution for your fertilising program.

Key Benefits:

- **Balanced Fertiliser:** Complete nutrition for crops and pasture.
- **Quick Acting:** Fast systemic uptake for rapid plant response.
- **Bio-available:** Improves soil health and nutrient availability.
- **Dual-purpose:** Suitable for both soil and foliar use for flexible farm management.

FAB26 Liquid Fertilisers

FAB26 is an advanced foliar spray combination that delivers stable, plant-available calcium and phosphate without microbial activation, supporting stronger roots, healthier foliage, and higher yields across fruits and vegetables.

Key Benefits:

- **Complete foliar nutrition:** Premium NPK + Calcium formula (5% N, 16% P, 4% K, 5% Ca) for improved crop performance.
- **True solution technology:** Keeps calcium and phosphate stable and mobile in the plant.
- **Boosts growth and yield:** Supports stronger roots, healthier foliage, and higher yields.

Urea alternative: Combine with our 32% Nitrogen product to stimulate growth and outperform traditional urea.

Water Health Solutions

AquaSplit

For cleaner, fresher, more efficient water, use AquaSplit! Made from durable stainless steel, German designed and patented, and no power needed. AquaSplit kills harmful bacteria & algae and guarantees water savings of up to 30%.

Key Benefits:

- Improved Hydration: Structured water is absorbed by animals at least 10% more efficiently.
- Increased Nutrient Uptake: Smaller mineral particles are absorbed faster and more completely.
- Healthier Animals: Enhanced nutrient delivery supports stronger growth, and improved resistance to stress and disease.

AquaRevive

Completely biological and sustainable, our water management bacteria utilises Aerobic Bacteria, doubling in number every 20 minutes to combat sludge and crust build-up in waste water.

Key Benefits:

- Reduces sludge and crust build-up: Breaks down solids to keep ponds cleaner and flowing.
- Boosts nutrient availability: Stabilises N, P, and K to improve soil and pasture uptake.
- Controls odours and improves water quality: Outcompetes odour-causing bacteria for fresher, healthier ponds.

Stock Health Solutions

MegaTrace Mineral Supplement

MegaTrace is a chelated, sea-based mineral supplement designed for livestock. It supports mineral balance, promotes optimal health, and helps maximise growth, production, and overall performance.

Key Benefits:

- Highly absorbable – Chelated minerals with amino acids ensure maximum uptake.
- Supports growth & production – Promotes weight gain, fertility, and overall performance.
- Maintains health & vitality – Prevents deficiencies, strengthens bones, and supports metabolic functions.
- Comprehensive mineral coverage – Contains 12 essential trace elements.

Apple Cider Vinegar

Our organic, double strength Apple Cider Vinegar is a natural antibiotic and antiseptic with healing and cleansing properties. It supports skin and coat health, helps relieve parasites like fleas and ticks, and may assist with conditions such as arthritis, mastitis, and cystitis.

Key Benefits:

- Supports health & wellbeing: Maintains acid/alkaline balance, boosts immunity, and promotes digestive and metabolic health.
- Natural parasite & insect control – Helps deter flies, midges, bot flies, fleas, and ticks, reducing stress and production losses.
- Rich in nutrients – High in acetic and malic acids and potassium, aiding strength, toxin elimination, and bacterial suppression.
